

Impreva Bath® Cleansing Washcloth

7988-X

Evidence-based solution:

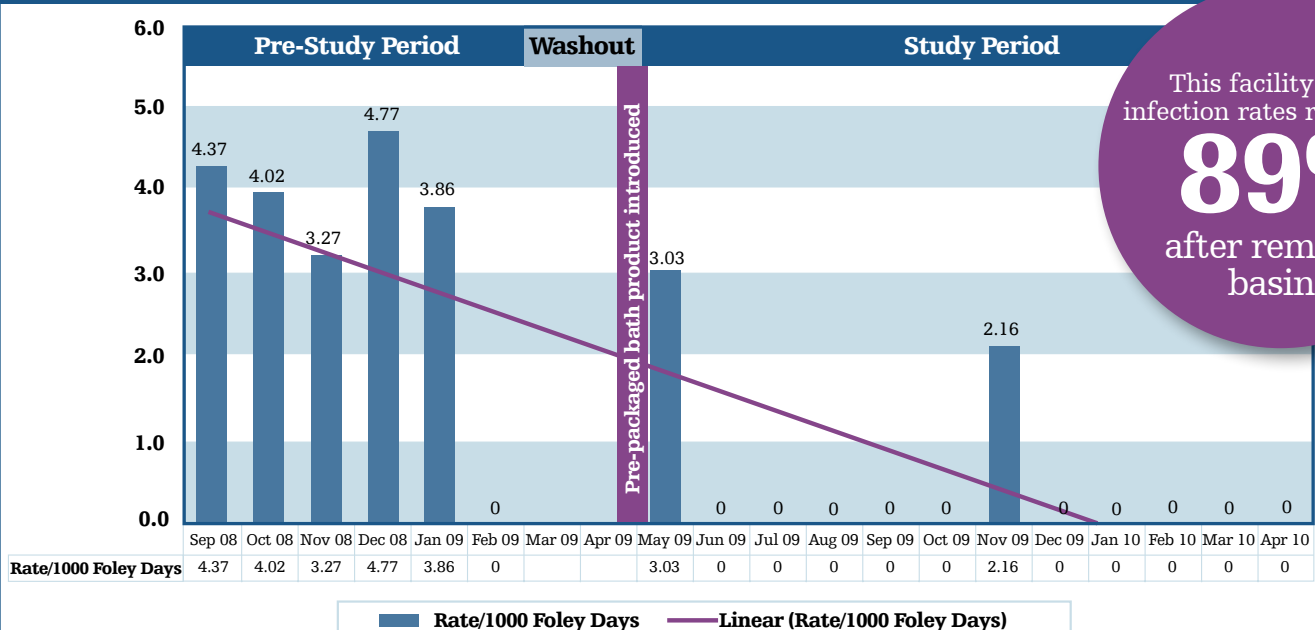

Remove water, soap and basins: Reduce CAUTI risk factors

Basins were completely eliminated from two medical/surgical units, and were replaced with Comfort Bath. This reduced CAUTI rates to zero within one month and remained at zero for five months.¹

Skin condition and satisfaction

One hospital study found 96% of patients said they preferred Comfort Bath over baths. 100% felt clean afterward, 96% said their skin felt soft, and 97% said it was warm, comfortable and easy to use.²

Hospital-Acquired CAUTI on 2 Medical/Surgical Units

1. Skiba S, Comfort Bath Cleansing System from Sage Products vs. the basin bath: patient preference. Chicago, IL 2000.

2. Stone S, et al., Removal of bath basins to reduce catheter-associated urinary tract infections. Poster presented at APIC 2010, New Orleans, LA, July 2010.

Impreva Bath[®] Cleansing Washcloth
